
Automation and Selenium

SESSION 6 – WORKING WITH WEB ELEMENTS

1. Use Selenium WebDriver or Katalon Recorder to automate selecting your favourite IPL team from a dropdown menu on a sample sports fan signup form.

Ans:

Aim: To automate selecting a favourite IPL team from a dropdown menu.

Favorito IPL Team: Chennai Super Kings (CSK)

Steps:

1. Open the sports fan signup form.
2. Click on the **IPL Team** dropdown.
3. Select **Chennai Super Kings (CSK)**.
4. Verify that **Chennai Super Kings (CSK)** is displayed as the selected team.

Expected Result:

Chennai Super Kings (CSK) is selected successfully from the dropdown.

Actual Result:

Chennai Super Kings (CSK) was selected successfully.

Status: PASS

2. Write an automation script that checks and unchecks multiple cuisine options (e.g., Pizza, Burger, Biryani) in a food delivery app-style form using Selenium or Katalon Recorder.

Ans:

Aim: To automate selecting and deselecting cuisine options.

Steps:

1. Open the food delivery form.
2. Select the **Pizza** checkbox.
3. Select the **Burger** checkbox.
4. Select the **Biryani** checkbox.
5. Uncheck the **Burger** checkbox.
6. Verify the selected options.

Expected Result:

- Pizza: Selected
- Burger: Unchecked
- Biryani: Selected

Actual Result:

The cuisine options were selected and unselected successfully.

Status: PASS

3. Automate the process of selecting a payment method (UPI, Card, Wallet) using radio buttons on a mock checkout page and verify the correct option is selected.

Ans:

Aim: To automate selecting a payment method.

Selected Payment Method: UPI

Steps:

1. Open the checkout page.
2. Locate the payment options.
3. Select **UPI**.
4. Verify that **UPI** is selected.

Expected Result:

The **UPI** payment option is selected successfully.

Actual Result:

UPI was selected successfully.

Status: PASS

4. Create a Selenium or Katalon Recorder script to pick a specific date (e.g., your birthday) from a date picker in a movie ticket booking form.

Ans:

Aim: To automate selecting a birthday from the date picker.

Test Data: 28 January 2006 (28/01/2006)

Steps:

1. Open the movie ticket booking form.
2. Click on the **Date of Birth** field.
3. Open the calendar.
4. Select **28 January 2006**.
5. Verify that **28/01/2006** is displayed in the date field.

Expected Result:

The selected date **28/01/2006** is displayed successfully.

Actual Result:

The date **28/01/2006** was selected successfully.

Status: PASS

5. Automate entering a city name in a search box with auto-suggestions (like Zomato), select the second suggestion, and verify the correct value is entered.

Ans:

Aim: To automate selecting a city from the auto-suggestion list.

Test Data: Surat

Steps:

1. Open the city search page (e.g., Zomato).
2. Click on the city search box.
3. Type **Surat**.
4. Wait for the auto-suggestions to appear.
5. Select the **second suggestion**.
6. Verify that **Surat** is displayed in the search box.

Expected Result:

The second suggestion is selected, and the city name **Surat** appears in the search box.

Actual Result:

The city **Surat** was selected successfully from the auto-suggestion list.

Status: PASS
